

WWW.GODADDY.COM

The following pages are instructions on how to get into your Godaddy domain registration account if you've lost your password.

First you need to get your customer account number. They sent you that when you bought the domain name a year ago but if you can't find it, they'll send it. If you changed email accounts since purchasing the domain name, these instructions won't work. Call me.

Another caveat is your email spam filter. If you don't get an email from Godaddy within 10 or 20 minutes, look in your "junkmail" box.

If you still don't find it, call Godaddy.

24/7 Sales and Support: (480) 505-8877 You'll need personal information like the last digits of the CC you used last.
